D: Oh! Didn't I tell you? I'm going to the city zoo with my family.

28 - Read the following Passage and then answer the questions.

Microbes

Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease.

There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes.

Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria!

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses. they usually attack your body and make you sick!

الف) True or False

- 1) Microbe is an important type of bacteria.
- 2) Viruses can live in any place in the world.
- 3) Bacteria do not need to be inside a living cell to live.

ب) Where can we find bacteria?

پ) How are bacterias different from viruses?

29 - Read the following Passage and then answe the questions?

Simple ways to protect wildlife

One easy way to protect wildlife is learning about endangered animals that live around you. Teach your friends and family about the wonderful birds, fish and plants that live near your home. In this way, they are going to be more careful about nature. You can also visit a national wildlife museum or park. These places give good information about how to protect endangered animals and their homes. You can do voluntary work in these places to help animals and their babies. Another thing you can do is protecting the natural home of the endangered animals. When you keep nature clean and safe, the animals will live longer. Protecting the trees of forests is also helpful. If you live in a village, you need to be very careful about the hunters who come to your village to hurt animals. Whenever you see these people, you need to call the police. These are simple works, but they will help nature a lot.

الف) Is it good to give information to our family about wildlife?

ب) True or False

Learning about endangered animals is not important.

You can do voluntary work in wildlife parks.

Keeping nature clean destroys animals.

پ) Why is protecting the trees helpful for endangered animals?

30 - Read the following sentences and circle the nouns.

الف) This is a low mountain, but those mountains are high.

ب) The weather is beautiful in the spring.

پ) Nasim read a book on the bus last week.

ث) I saw two wolves in the zoo.

31 - Circle the correct answer.

الف) Amin (askari / Askari) is a pilot. He is 40 (Years / years) old. He lives with his (Wife / wife) and his son and daughter in (mashhad / Mashhad). He loves his job.

ب) Today, (iran / Iran)'s mountains and plains are the natural (Home / home) of many animals. One of them is the black (Bear / bear) which lives in a few (Parts / parts) of the country.

پ) The (persian / Persian) Gulf is a very important sea between Iran and some (arab / Arab) countries. Its (wildlife / Wildlife) is amazing. You can (See / see) some beautiful sea animals such as (Dolphins / dolphins) there.

32 - Read the following passage and then answer the following question.

Endangered Animals

Today, there are some endangered animals on Earth. It means that we can find only a few of them around us. Some examples are whales, pandas, tigers and Asian elephants.

Humans destroy the natural homes of the animals in the forests, lakes, and plains. When the number of people on Earth increases, they need more places for living. They cut trees and destroy lakes. They make homes and roads instead. Then the animals won't have a place to live. They will die out.

The Iranian cheetah is among these animals. This wild animal lives only in the plains of Iran. Now there are only a few Iranian cheetahs alive. If people take care of them, there is hope for this beautiful animal to live. Recently, families are paying more attention to nature, students learn about saving wildlife, and some hunters don't go hunting anymore. Hopefully, the number of cheetahs is going to increase in the future.

الف) 1-Which of them is not an endangered animal?

- a) wolf b) cheetah c) horse

ب) 2-Where is the natural home of the Iranian cheetah?

- a) forest b) plain c) mountain

پ) 3- Which place is not a natural home of wild animals?

f: About what Jane?

37 - There are different animals living on Earth. Animals like leopards, lions, tigers, cheetahs and elephants are wild. They live in their own natural home. Other animals live with or near humans. Cows, camels, ducks and goats are examples of farm animals living with humans.

We can also divide wild animals based on where they live. While some wild animals like monkeys and tigers live in the jungle, others live in the desert. Snakes, types of mice and lizards are all desert animals. Animals like zebras and leopards live in the grasslands. And of course, fish, turtles, sharks and whales are sea animals. Jungles, deserts, grasslands and seas are natural homes, or natural habitats, of different wild animals.

All the animals live well together in their natural habitats. That doesn't mean they don't hunt other animals. They all get what they need from their habitats. Still, they are part of nature. Each animal plays a role in its natural home. And they don't destroy nature.

الف) TRUE OR FALSE

1. Animals living in their natural homes don't hurt other animals.
2. Each animal has a special part in the place it lives.
3. Snakes and lizards are wild animals but turtles are not.
4. Goats and sharks have the same habitats.

ب) ANSWER THE FOLLOWING QUESTIONS.

52 - Yesterday, we had science at school. My teacher, Mr. Ahmadi, asked us to think about nature. We talked about how humans are destroying other living things and their natural homes. We talked about the increasing number of animals and plants which are dying out because of the changes we are making. We also talked about ways which help save the earth. Mr. Ahmadi asked us to pay attention to the simple but helpful things each one of us can do to protect the environment.

My classmates and I are now planning to divide into two voluntary groups. Each group has a role to play. We are going to protect endangered animals and plants. The first group is going to make some brochures to have people's attention to the wildlife. We'll show them how important it is to do something about it. The second group will try to help clean the environment. They'll collect garbage like plastic bags and bottles to keep nature safe and clean. Hopefully, we'll have a clean and safe earth for us and for all other living things in the future.

Cheetahs are part of the big cat family. While they can't climb trees, they can run faster than any other land animal. They can

reach a top speed of around 113 km per hour. Cheetahs are smaller than other members of the big cat family, weighing only 45 – 60 kilograms. They have a life span of 8 to 10 years in the wild. Cheetahs are the only big cat that cannot roar. Instead, they can purr, like domestic cats! While lions and leopards usually do their hunting at night, cheetahs hunt for food during the day. Cheetahs eat mainly gazelles, and other small animals.

Domestic cats usually purr to show happiness.

Lions roar to scare away other wild animals.

Did you know that we can hear a lion roar from miles away?

Cheetahs are not usually dangerous to humans; they don't usually attack people. Some people actually kept them as pets in the past. Some zoos even let you get really close to the animal.

In the past, people hunted cheetahs to stop them from eating the animals they kept on the farms, although studies show that cheetahs don't usually do so.

In 1900, there were over 100,000 cheetahs across the planet. Today, there are 9,000 to 12,000 cheetahs in the wild in Africa.

In Iran, there are about 100 cheetahs living in small populations in the Khorasan province. They are listed as endangered species.
